

Ravelin3D

We are an owner-operated communications agency with seven offices in Switzerland, the Southern part of Germany and the Principality of Liechtenstein.

For one of my clients I was searching for a partner who is able to do the rendering to visualize a new building and one of my colleagues in Switzerland told me about RAVELIN 3D.

I admit first I was sceptic about the back-office and correction steps – will we understand each other in english, is the implementation reliably etc.

My reservations have been unfounded – the professional contact person are distinctly helpful, they answer prompt and care for the costs. It was a pleasure to work with them.

Of the result the client and we are more than satisfied!

Kind regards
