Daniel Kazakov
Ravelin 3D

To Whom It May Concern:

Our experience with Ravelin 3D was very positive, and it is with great pleasure and ease that we write this note as a reference for their work and process.

In any project, communication and the flow of information is key. Ravelin3D consistently met our needs by listening and understanding the design intent of our work. This collaboration created hyper-realistic renderings and an astonishing VR model. Our client had never visited a “virtual reality space” prior to the Ravelin model we showed him. He was overawed, and spent many quiet moments looking around and seeing the many views afforded by the large, walk-through model.

In addition to the extremely impressive VR model, Ravelin 3D produced beautiful, high resolution renderings. These were excellent as stand-alone boards to augment our presentation when the client was no longer “in the model”. From our experience with other clients, we know the effectiveness of virtual reality. Ravelin 3D exceeded our expectations.

We look forward to continued work with Ravelin 3D. They are a valuable asset to any team.

Best regards,

Douglas C. Wright
